Paramjyot Tooray

DevOps Engineer

param_2ray@hotmail.co.uk 416-528-2923 LinkedIn GitHub Portfolio

Profile

DevOps Engineer with hands-on experience designing and automating AWS infrastructure using Terraform, Docker, Kubernetes and GitHub Actions. Built ECS and EKS platforms and contributed to a nine-microservice EKS V2 team project through CoderCo. Reduced an ECS Docker image from 2.55 GB to 80.4 MB, achieving a 97% reduction using multi-stage builds. Experienced in CI/CD, cloud networking, infrastructure security and observability.

Skills

AWS ECS, EKS, VPC, IAM, CloudWatch | **Git** | **Linux** | **ArgoCD** | **Helm** | **Terraform** | **Python** | **Bash** | **Docker** | **Networking** | **Kubernetes** | **GitHub Actions** | **Prometheus** | **Grafana**

Professional Experience

CoderCo – DevOps Academy 09/2025 – Present

DevOps Engineer

- Built **AWS ECS** and **EKS** environments using **Terraform**, **Docker** and **Kubernetes**.
- Contributed to a nine microservice **EKS platform** during a four-week CoderCo team simulation.
- Implemented **AWS Secrets Manager** and **KMS** integration with scoped **IAM permissions** for **Kubernetes** workloads.
- Automated infrastructure and application workflows using **GitHub Actions**, **OIDC** and **ArgoCD**.
- Configured HTTPS ingress and automated DNS and TLS management using **Helm**, **Traefik** and **cert-manager**.
- Integrated **CloudWatch**, **Prometheus** and **Grafana** to support infrastructure monitoring and troubleshooting.
- Reduced an **ECS** Docker image from **2.55 GB** to **80.4 MB**, achieving a **97%** reduction using multi-stage builds.
- Integrated **Trivy** and **Checkov** into **CI/CD** workflows to identify container vulnerabilities and **Terraform** misconfigurations before deployment.
- Diagnosed and resolved deployment failures involving load balancer routing, **IAM** permissions and **Kubernetes** configurations using logs and infrastructure analysis.

Projects

AWS EKS Microservices Platform

A **Kubernetes** based e-commerce order fulfilment platform consisting of nine Go microservices, developed during a four-week CoderCo team simulation.

- AWS infrastructure managed using **Terraform**, **EKS** and **Helm**.
- Cloud-native architecture incorporating **CI/CD**, **GitOps**, **IAM** security and **secrets management**.

Amazon EKS Production Platform

A **Kubernetes** application platform designed to demonstrate automated deployments, secure HTTPS access and cloud-native infrastructure management.

- **GitOps** based deployments using **ArgoCD**, **Helm** and **GitHub Actions**.
- Automated DNS and TLS management using **Traefik**, **ExternalDNS** and **cert-manager**.

ECS Fargate Healthcheck Platform

A containerized health monitoring platform running Gatus on **AWS ECS Fargate** to monitor application availability.

- **Terraform** managed infrastructure with HTTPS access through an Application Load Balancer.
- Automated **CI/CD** using **GitHub Actions** and **OIDC**, with operational logging through **CloudWatch**.

Education

BA Business Studies - London South Bank University
